ABSTRACT

This document is the 26th in a series that presents data on school districts in Minnesota in the areas of enrollment, staffing, and finance. Since 1994-1995, data has been presented as per average daily membership, but before that, weighted average daily membership was used. Increases in student enrollment in Minnesota began with the 1985-1986 school year and continued through 1999-2000, but at a reduced rate. Enrollment in 1998-1999 totaled 846,664 average daily membership. These students are enrolled in districts that vary greatly in size, but the 10 largest districts enrolled almost 30% of the state's public school students. The sections of this report are: (1) "Introduction"; (2) "Uniform Financial Accounting and Reporting Standards Sources of Expenditure Data Definitions" (3) "Trends and Patterns"; (4) "Definitions of Data Elements"; (5) "List of School Districts"; (6) "Map--Minnesota Counties and Development Regions"; (7) "Data for School Districts"; (8) "Data for Counties, Development Regions, and the State"; (9) "Data for Enrollment Size Groups"; and (10) "Summary Statistics." Sections 7 through 10 are in table form. (SLD)

CV

School District Profiles, 1998-99 is the twenty-sixth in a series which presents data on school districts in the areas of enrollment, staffing and finance. Beginning with 1994-95, data is presented as per average daily membership (ADM). Prior to that, data was per weighted average daily membership (WADM).

In order to cut costs, the Department will not be mailing this publication to school superintendents in this or future years. Copies are available from the Minnesota Bookstore at 1-800-657-3757.

If you need more information, please contact Mike Enman at 651-582-8770 or via e-mail.

This report is available in pdf format below. The report is best viewed with Adobe Reader 3.01. If you do not have Adobe Reader installed you can get a copy from Adobe's Website.

Interdistrict Cooperation and Consolidations

Minnesota legislation has encouraged Minnesota school districts to cooperate in the provision of education services to ensure efficient and effective operation.

Academic Pairing

Ruthton Russell

584

districts offering different grade levels. Thirty-six districts services for all grades. This allowed districts to enter into requirement that every school district provide education agreements for the provision of services, with "paired" participated in academic pairing during the 1998-99 Laws enacted in 1979 and 1983 eliminated the school year.

INTRODUCTION

Consolidations

Declining enrollments in many districts, combined with legislated financial incentives, have resulted in a number of school district consolidations in recent years. Between the 1998-99 and 1999-2000 school years thirteen districts combined to form six new districts. These are:

TRENDS AND PATTERNS

TRENDS AND PATTERNS

Students

Minnesota PK-12 enrollment increases began with the 1985-86 school year and continue through 1999-2000, but at a reduced rate (Figure 1). Enrollment in 1998-99 totaled 846,664 average daily membership (ADM), a 0.55% increase over the 1997-98 total of 842,058. Also, a greater proportion of students are in the secondary grades.

Minnesota's school districts vary greatly in enrollment. The 10 largest districts, all in metropolitan areas, enrolled almost 30 percent of Minnesota's public school pupils.

Minnesota, like the rest of the nation, is experiencing a growth in the proportion of its population classified as minority. Minority population growth shows up in school enrollments (Figure 2). Although Minnesota's minority enrollment percentages increased significantly from 6.1% in 1986-87 to 15.0% in 1998-99, this is still only about one-third of the United States percentage.

Further, Minnesota's minority composition is different from that of the United States as a whole (Table 1, Page 10). American Indians have always constituted a more significant proportion of Minnesota's enrollment and the Asian population became more significant after the Vietnam war.

Instructional Staff

Compensation for teachers and other licensed district staff constitutes districts' largest operating cost. Figure 4 shows the number of these staff over the past decade. The accompanying table also shows the ratio of pupils (in ADM) to licensed professional staff. This ratio shows a decrease from 1997-98 to 1998-99, from 14.4 to 14.0.

Advanced Degrees

School revenues come from three sources: local (predominantly property taxes), state, and federal. Figure 8 shows that the percentages of revenue received by Minnesota school districts

FIGURE 8 Statewide Average Sources of Revenues for All Funds 1989-90 Through 1998-99

from the three sources have varied over the last decade. In 1991-92, as a result of state budgetary problems, school districts were required to "recognize" certain levy receipts earlier than in prior years. This earlier recognition had the effect of shifting the state/local mix towards a larger local contribution since early property tax receipts replaced state aids. The ratio further decreased in 1992-93 but rebounded in 1993-94 to percentages which typify most of the period. The state percentage increased from 1997-98 to 1998-99, from 52% to 57%.

Minnesota's four or five percent federal revenue percentage is less than the national average of approximately six percent. Federal funds are typically targeted toward specific minority and

disadvantaged student populations - groups which constitute a smaller proportion of Minnesota's enrollment than they do nationwide.

Another way of examining Minnesota's PK-12 revenues is by accounting fund. A fund in the Uniform Financial, Accounting and Reporting Standards (UFARS) system is a self-contained set of accounts established for either general purposes or for a specifically defined set of fiscal activities such as food service or debt redemption. Table 2 compares Minnesota school district revenues in the six UFARS funds existing in 1998-99. The 1989-90 funds were reformatted to reflect current active funds. Over that period the proportion of revenues allocated to nonoperating funds grew dramatically, led by sizable increases in the Building Construction Fund.

Expenditures

FIGURE 9

Figure 9 indicates that statewide average operating expenditures per pupil, as adjusted by the Consumer Price Index (CPI) 1985-86 base year, have grown over most of the decade at a rate slightly exceeding inflation. These expenditures vary district-to-district as shown in Figure 10. Districts at the 95th percentile expended approximately 54 percent more per average daily membership than districts at the 5th percentile. (In this comparison, small districts count the same as large districts.)

The distribution of operating expenditures by program has also changed over the decade as indicated in Table 3. Operating expenditures include those in the General, Food Service, and Community Service funds.

Figure 11 indicates that nonoperating expenditures per ADM also continued to grow. Non-operating expenditures include Capital Outlay, Building Construction and Debt Service

FIGURE 11 State Average Non-Operating Expenditures Per Average Daily Membership 1988-89 Through 1998-99

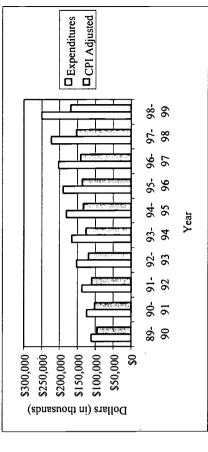

(columns 32, 34 and 35, respectively, in the district detail). The increased spending may be due, in part, to increased state funding for non-operating costs.

Community Services

Figure 12 shows the growth in community service expenditures from 1989-90 to 1998-99. It shows that these expenditures also have grown faster than the general rate of inflation. Community education/community service programs include expenditures for recreation, civic activities, adult education, early childhood education, educational programs which are not conducted primarily for elementary and secondary students, and noncredit summer school programs.

FIGURE 12 State Total Community Service Expenditures 1989-90 Through 1998-99

Operating Funds Balance

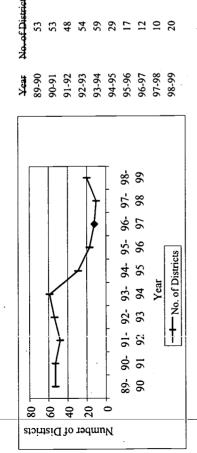

A school district's Net Unappropriated Operating Fund Balance (NUOFB) is a measure of its financial health at the end of the school year. It can be either positive or negative. A positive NUOFB balance represents a financial reserve; a negative balance means that liabilities (debts) exceed financial assets. Districts with a negative year-end balance greater than 2.5 percent of their prior year's operating expenditures are defined as being in violation of expenditure limitations specified by Minnesota Statute and are deemed to have "statutory operating debt" (SOD). They are required to submit a plan to the Commissioner of Children, Families & Learning explaining how they will eliminate the deficit. In the measure, ten reserves and their related expenditures are not included.

Figure 13 (next page) indicates that the downward trend in the number of districts in statutory operating debt (SOD) since 1993-94 reversed in 1998-99. The number increased from 10 to 20, not including charter schools.

Page 14

TRENDS AND PATTERNS

Number of Districts With Net Unappropriated Operating Debt Exceeding 2 1/2% of Yearly Expenditures, 1989-90 Through 1998-99 FIGURE 13

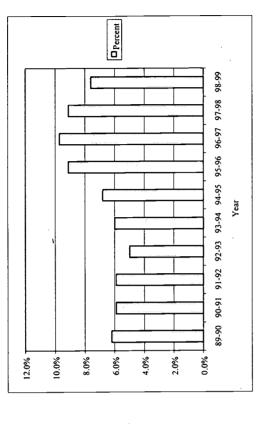

as a percent of total operating expenditures decreased from 1996-97 column 36 of the district data. Figure 14 shows that the state total reserve balances. This balance is reported on a per ADM basis in reserved balances, while the NUOFB excludes only 10 specified unreserved operating funds balance. This measure excludes all Figure 14 concerns a different operating balance: The total to 1998-99, from 9.7% to 7.6%.

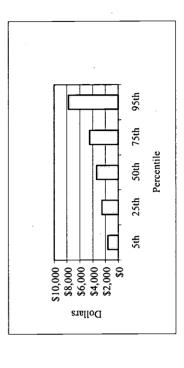

Adjusted Net Tax Capacity

A school district's Adjusted Net Tax Capacity (ANTC) per ADM is a measure of real and personal property subject to a local property tax levy. ANTC per ADM differs among the school districts. As Figure 15 indicates, districts at the 95th percentile have about 4.8 times the Adjusted Net Tax Capacity per ADM as districts at the 5th percentile. Minnesota has taken measures over the years to neutralize the effects of these differences.

State Total Unreserved Operating Funds Balance as a Percent of Total Operating Expenditures 1989-90 Through 1998-99 FIGURE 14

Distribution of 1997 Adjusted Net Tax Capacity Per 1998-99 Average Daily Membership FIGURE 15

DEFINITIONS OF DATA ELEMENTS

The tables on pages 26 through 61 contain 42 separate statistics for each school district, county, region, and size of district in the state. Definitions of these 42 statistics are given below. All data are for the 1998-99 school year.

Average daily membership (ADM) is the average number of pupils in membership during the school year. Pupils need not be in attendance to be counted in ADM, but they must be in membership (i.e., currently enrolled in the district). A student can be absent without explanation for three weeks before he or she is dropped from membership.

Pupil Data

Resident Average Daily Membership

The ADM counts in this section are counts of total resident ADM, including all residents who are (a) enrolled in their home district, (b) educated in another district for whom tuition is paid; or (c) attending another district under the Enrollment Options legislation. Resident membership includes:

Pre-Kindergarten Disabled Resident ADM of prekindergarten

students enrolled in special education programs.

- Kindergarten Resident ADM of students enrolled in kindergarten classes.
- 3. Elementary (Grades 1-6) –
 Resident ADM of students enrolled in grades 1 6, including students in elementary level ungraded and special education classes.
- 4. Secondary (Grades 7-12) Resident ADM of students enrolled in grades 7 12, including those students in secondary level ungraded and special education classes.
- 5. Total (PK-12) Total Resident ADM of all district residents, prekindergarten through grade 12; this is the total of columns 1 through 4.

Other Pupil Data

6. Total ADM Served – This includes residents attending their home district, resident students tuitioned to other school districts, nonpublic school students being served via a Shared Time program, nonresident students who transfer in via one of the attendance options programs, and nonresident tuition students.

Excluded is the portion of a student's time spent in a postsecondary institution via the Postsecondary Enrollment Options Program, as well as those residents who transfer to other districts via one of the attendance options programs.

- Percent Minority The percentage of the district's students who are of Native American/Alaskan, African American, Asian or Hispanic ancestry.
- 8. Percent Attendance The ratio of days attended to days in membership for all students in the district.
- 9. Percent Transported The percentage of resident public school students eligible to be transported to and from school.
- Lunch The percentage of students eligible for free or reduced price lunches in 1998-99. This data is derived from the Application for Education Benefits completed by families at the individual school districts. The percentage is calculated by dividing the number of eligible students by the total October 1 enrollment.

DEFINITIONS

Professional Staff

These statistics provide information about each district's professional staff. Staff are counted in full time equivalents (FTE). For example, a full time staff member is counted as 1.0 FTE; one employed only half time is counted as 0.5 FTE.

11. Total Licensed Professional Staff

(FTE) – The total number of licensed professional staff employed by the district, measured in full-time equivalents (FTE). This count includes administrators, classroom teachers, and all other licensed professional personnel.

12. Pupil-Professional Staff Ratio – Total average daily membership (ADM) served (Col. 6) divided by the number of licensed professional staff (Col. 11).

13. Total Licensed Instructional Staff (FTE) – The total number of licensed instructional staff employed by the district measured in full-time equivalents (FTE).

14. Pupil-Instructional Staff Ratio – Total average daily membership (ADM) served (Col. 6) divided by the number of licensed instructional staff (Col. 11).

Tax Capacity Rates

These figures show school district tax levies expressed as a percentage of tax capacity for school district property taxes payable in 1998. Taxes payable in 1998 provided revenue for the 1998-99 school year.

15. Auditor Percent – The actual school district tax rate as determined by the county auditor. With a rate of five percent, a property owner would be taxed \$5 for each \$100 of tax capacity. Because of differences in property assessment practices between counties, comparisons of auditor tax rates among districts may be misleading (see No. 16). This figure includes additional tax rates for special intermediate districts (No. 287, 916 and 917) where they are part of a district's tax burden.

16. Equalized Percent – This tax rate is computed by multiplying the auditor percent (No. 15) by the 1998 market sales ratio. This ratio is equal to the market values, as determined by the local assessor, divided by the actual selling prices. Equalized percents are computed to compensate for varying assessment practices. Thus, when making interdistrict comparisons, these

rates may provide a more valid comparison.

Revenue Percentages

These three columns show the percentage of each district's total revenues received from the federal government, the state government, and local and other sources. The percentages are based on all 1998-99 revenue reported by each district, except for proceeds from sales of real property and equipment, insurance recoveries, sales of bonds, loans and interfund transfers.

17. Federal – The percentage of revenues from the federal government, whether paid directly to the district or through another governmental unit.

18. State – The percent of revenues from Minnesota state government.

19. Local and Other – The percent of revenues from local sources, including property taxes, fees, county apportionment, etc.

1997-98 Expenditures Per ADM

sixteen different categories, divided by Columns 20 through 35 show each district's 1998-99 expenditures in otal ADM served (Col. 6).

20. District and School

Administration - Expenditures for Funds 1, 8, 9; Program Series 001the school board and for the office and any other line administrators 099; and all Object Series except of the superintendent, principals, who supervise staff. (Includes 500-599 & 910.)

21. District Support Services –

and school administration. Includes all Object Series except 500-599 & expenditures for business services, 8, 9; Program Series 100-199; and school census. (Includes Funds 1, operations not included in district personnel office, printing, and the administration and central office Expenditures for central office data processing, legal services,

22. Regular Instruction -

not including vocational instruction ion (Col. 24). Includes salaries of eachers, classroom aides, coaches, (Col. 23) and exceptional instrucsecondary classroom instruction, Expenditures for elementary and

Funds 1, 8, 9; Program Series 200supplies and textbooks. (Includes 299; and all Object Series except and expenditures for classroom 500-599 & 910.)

23. Vocational Instruction –

utive education. (Includes Funds 1, living science, as well as industrial, all Object Series except 500-599 & Expenditures in secondary schools for instruction that is related to job 8, 9; Program Series 300-399; and business, agriculture, and distribncludes expenditures for family skills and career exploration.

24. Exceptional Instruction –

mentally retarded; for students with provided educational programs that Funds 1, 8, 9; Program Series 400tional programs. Includes expendare different from regular instrucstudents with special learning and students who, because of atypical 499; and all Object Series except characteristics or conditions, are students who are emotionally or Expenditures for instruction of tures for special instruction of behavior problems. (Includes physical, hearing, speech, and psychologically disabled, or visual impairments; and for 500-599 & 910.)

25. Instructional Support Services -

assisted instruction. (Includes Funds 1, 8, 9; Program Series 600-699; and expenditures for assistant principals, media centers, audio visual support, Expenditures for activities intended to help teachers provide instruction, all Object Series except 500-599 & curriculum development, libraries, staff development, and computernot including expenditures for administration. Includes 910.)

26. Pupil Support Services –

food service. Includes expenditures ional services provided to students, services. (Includes Funds 1, 8, 9; 799: all Object Series except 500-Program Series 700-749 and 770or counseling, guidance, health not including transportation and services, psychological services, Expenditures for all noninstrucand attendance and social work 599 & 910.)

27. Operations and Maintenance –

equipment. Includes expenditures electricity, telephones, and repairs. for custodians, fuel for buildings, Includes Funds 1, 8, 9; Program district's buildings, grounds, and Series 800-899; and all Object maintenance, and repair of the Series except 500-599 & 910.) Expenditures for operations,

~1 の

DEFINITIONS

28. Food Service – Expenditures for the preparation and serving of meals and snacks to students.

(Includes Fund 2; all Program Series; and all Object Series except 500-599 & 910.)

29. Pupil Transportation -

Expenditures for transportation of students, including salaries, contracted services, fuel for buses, and other expenditures. (Includes Fund 1; Program Series 750-760 and all Object Series except 500-599 & 910.)

30. Other Operating Programs -

Expenditures for general fund operating programs necessary to a district's operations but not assignable to other programs. These can include federally funded community education services for students, property and liability premiums, principal and interest on noncapital obligations, and nonrecurring costs such as judgments and liens. (Includes Funds 1, 8, 9; Program Series 500-599 & 900-999; and all Object Series except 500-599 & 910.)

31. Total PK-12 Operating

Expenditures Excluding Capital
Expenditures – The total of the
eleven preceding categories of
expenditures (Columns 20 through

30). This figure includes all operating expenditures incurred for the benefit of elementary and secondary education during the 1998-99 school year, except capital expenditures. Construction and Debt Service expenditures are nonoperating expenditures.

32. Capital Outlay – All capital expenditures charged to the operating funds. (Includes Funds 1, 2 and 4; all Program Series; and Object Series 500-599.)

33. Community Service -

Expenditures for recreation, civic activities, adult education, early childhood education, or similar programs which are not conducted primarily for elementary and secondary students, and for noncredit summer school programs. (Includes Fund 4; all Program Series; and all Object Series except 500-599 & 910.)

34. Building Construction - All

expenditures charged to the district's Building Construction Fund. Expenditures are for major capital projects funded by bond proceeds, state Capital Loans, state Facility Grants or the Downpayment Levies. (Includes Fund 6, all Program Series; and all Object Series except 910.)

35. Debt Service – Expenditures for repayment of long term debt including payments of principal and interest on bonds and capital loans. (Includes Fund 7, all Program Series, and all Object Series except 910.)

Other Measures Per ADM –

Columns 36 through 42 show other measures per ADM in seven different categories divided by total resident ADM (Col. 5).

36. Total of Unreserved Operating

Funds Balances – This figure is a measure of the district's financial condition at the end of the 1998-99 school year. It is equal to the sum of the unreserved balances on June 30, 1999 from the three operating funds (General, Food Service, and Community Service) divided by 1997-98 Resident ADM (Col. 5). This measure is different than the Net Unappropriated Operating Fund Balance per ADM which is used to determine if a district has operating debt beyond what is allowed in statute.

37. Change in Unreserved Funds

Balances – The difference between the district's operating funds balance on June 30, 1999 (see No. 36 above), and on June 30, 1998, divided by 1998-99 resident ADM.

revenues and expenditures in 1997expenditures in the operating funds number indicates that the district's were greater than its revenues in difference between the district's 98 for the three operating funds This is essentially equal to the combined. Thus, a negative these funds.

includes all reserved fund balances in the operating funds divided by 38. Total of Reserved Operating Funds Balances - This figure resident ADM (Col. 5)

financial condition at the end of the Balance – This figure is a measure 1998-99 school year. The balance ADM (Col. 5). This measure is Unappropriated Operating Fund s divided by 1998-99 Resident of the district's General Fund 39. General Fund Unreserved different than the Net Balance per ADM.

40. General Fund Reserved Balance divided by resident ADM (Col. 5). This figure includes all General Fund reserved fund balances

Resident ADM (Col. 5). Long-term 41. Long Term Debt - The amount of long-term debt outstanding on June debt includes bonds and capital 30, 1999, divided by 1998-99

debt service, and energy loans from the state.

Capacity – The 1998 adjusted net tax capacity of the district divided by 1998-99 Resident ADM. This 42. Prior Year Adjusted Net Tax figure is an indicator of the district's ability to raise revenue

through local property taxes.

School District Profiles, 1998-99 is the twenty-sixth in a series which presents data on school districts in the areas of enrollment, staffing and finance. Beginning with 1994-95, data is presented as per average daily membership (ADM). Prior to that, data was per weighted average daily membership (WADM).

In order to cut costs, the Department will not be mailing this publication to school superintendents in this or future years. Copies are available from the Minnesota Bookstore at 1-800-657-3757.

If you need more information, please contact Mike Enman at 651-582-8770 or via e-mail.

This report is available in pdf format below. The report is best viewed with Adobe Reader 3.01. If you do not have Adobe Reader installed you can get a copy from Adobe's Website.

SUMMARY STATISTICS

This table shows the percentile distribution of each of the 42 statistics in the data tables. The breakdown is for each statistic separately and all districts are treated as The table may be used to better understand the distribution of a particular variable among Minnesota school districts. For example, percent attendance (column 8) single units. For example, the 95th percentile represents the value for the 330th district out of the total 347 districts.

varies little; ninety (90) percent of the school districts are within the narrow range of 91.4% (5th percentile) to 96.7% (95th percentile).

The table may also be used to see how an individual school district compares with other districts in the state. Two examples illustrate the use of the data:

- A district that has total PK-12 operating expenditures (column 31) of \$6,500 per ADM is very near the median value, which is \$6,407. Thus, about half the districts in the state have lower expenditures and about half have higher expenditures per ADM.
- A district with total average daily membership of 450 ADM (column 5) is between the 20th and 25th percentiles for this statistic. 7

SUMMARY STATISTICS

staff (column 11) is 23. This means that ten percent of the school districts have 23 or fewer staff members (FTE). The 25th, 50th, and 75th percentiles are called quartiles; the XXth Percentile. For any specific variable, a value chosen such that XX percent of the school districts are below the chosen value. For example, the 10th percentile for total 10th, 20th, 30th, ... through the 100th percentiles are called deciles.

Lowest and Highest Values. For any specific variable, the lowest and highest values for each variable.

Median. For any specific variable, a value chosen such that half of the school districts are below the chosen value and half are above.

State Total. For variables 1-5 columns(1998-99 resident average daily membership), column 6 (ADM served), column 11(total staff), column and 12 (instructional staff), the state total is simply the sum of the corresponding values for all districts listed in the report. For all other variables, the state total is computed as the sum of the numerators for all districts, divided by the sum of the denominators. For these variables, the "state total" is the state average with larger districts affecting the average more.
